

# Cajas ventilación motor directo a eje

## Cajas CD/ CLASS Horizontales. CD/ CLASS Verticales + 2%

### CD

Caja ventilación construida en chapa galvanizada. Dos laterales practicables, para mantenimiento del ventilador. Aislamiento en Politec M1-10 mm de espesor, burbuja cerrada y con lámina de aluminio superficial, impidiendo la absorción de humedad. Motor sobre guías montadas en amortiguadores de caucho.

### CLASS

Caja construida en perfiles de aluminio y chapa lacada. Desmontable. Aislamiento en politec. Motor sobre guías montadas en amortiguadores de caucho.

### Códigos

VCDH Caja CD horizontal. VCDV Caja CD vertical. VCL Caja Class.

### Motores

Motor cerrado con aislamiento IP44

Motor 3 velocidades cerrado IP44. Cambio de velocidades por conmutador 3 posiciones VCON 3V.

Motor rotor exterior IP44. Alta calidad de regulación.

Todos los motores monofásicos son regulables mediante reguladores de la serie RVM. Cajas CLASS con motor 3 velocidades o rotor exterior, consultar precios.
