

Air Knight®

AIR PURIFICATION SYSTEM

PX5 PHOTO IONIC OXIDATION

Our all new quint-metallic core naturally breaks down indoor pollutants in the air AND...on surfaces anywhere in the conditioned space.

CLEANER FRESHER, INDOOR AIR!

The Air Knight® Air Purification System uses a unique new indoor air quality process to naturally produce ionic oxidizers that actively seek out and purify pollutants in the air AND on surfaces.

ACTIVE AIR PURIFICATION

The Air Knight® Air Purification System uses a unique new technology consisting of UV light energy combined with a 5-metal, quint-metallic core to produce a proactive, advanced oxidation to cleanse air and surfaces.

This new technology produces ionic oxidizers, such as hydro-peroxides, super oxide ions and hydroxides. These oxidizers become hydrogen and oxygen molecules in the indoor air after the purification process.

By engineering the proper UV light spectrum in combination with the quint metallic core, the Air Knight® produces a virtually maintenance free unit that reduces odors, air pollutants, VOC's (chemical odors), smoke, mold, bacteria, and viruses.
