## INDUSTRIAL TEMPERATURE SENSOR TES NTC 2.2

TES NTC 2.2 temperature sensor is designed for automatic HVAC systems, especially for demanding conditions such as saunas, cold-rooms, freezers and stores.

Temperature is detected by a NTC element with a nominal resistance of $2.2 \mathrm{k} \Omega$ at $25^{\circ} \mathrm{C}$.

Housing is made of weather-proof aluminium, IP67 also ensuring a good mechanical protection for the sensor.

Sensor resistance at different temperatures:
