

DUCT TEMPERATURE SENSOR TEHU NTC 10-C

TEHU NTC 10-C sensor is made for automatic HVAC systems to detect room temperatures.

Temperature is detected by a NTC sensor element with a nominal resistance of 10 k Ω at 25 °C.

Housing of white plastic (ABS) is made for mounting on a standard 60mm junction box. Sensor matches well with other electrical flush mounting products. It can be installed together with products of "Artic"-series.
