

## DUCT TEMPERATURE SENSOR TEK KP 10

TEK KP 10 temperature sensor is designed for automatic ventilating systems to detect duct temperatures.

Temperature is detected by a KP sensor element with a nominal voltage of 2.73 V at 0 °C.

Housing is made of heat-resistant plastic. The cover and the terminal blocks are tilted 45° to provide easy installation. Sensor is mounted to the duct by using an adjustable duct connection flange.

Installation depth can be adjusted approximately from 100 to 200 mm.
